

SDC EntryCheck™

## SINGLE ACCESS POINT CONTROL

Indoor Digital Keypads

**918**  
Self-Contained

**918W**  
Weigand Output

### WHAT YOU NEED TO KNOW:

SDC self-contained digital keypads are designed to control a single access point up to 500 users. All EntryCheck® keypads are uniform keyboard programmable for convenience.

The EntryCheck® standalone digital access control family of keypads assigns each user a personal identification number (PIN). Keypad entry of a valid one to six digit code activates one or both of the output relays which releases an electric door lock.

Each keypad comes with four outputs, two relay and two solid state outputs timed or latching (on/off) and also has a request-to-exit input for connection to an exit switch and/or fire access key switch for fire/emergency access. The tactile keys provide loudness selectable audible volume for key depression or output activation.

### HOW YOUR CUSTOMER BENEFITS:

- Uniform keypad features
- Keypad programmable
- 12-key illuminated, moisture-resistant keypad
- Tactile keys with selectable audible levels for key depression or output activation
- Thick stainless steel faceplate
- Faceplate finish alternatives available
- Tamper-resistant screws
- Adjustable audible annunciation
- Visual status indicators (LED)
- 12/24 VAC/DC input
- Single-gang wall mount
- Request-to-exit (REX)
- Weigand output model available
