

# IPD Series

## IP-Based Access Controllers

SDC IPPro® IPD series IP-based single door access controllers come with two ethernet ports for interfacing with an additional IP device. They allow expansion from one standalone door up to a 100-door "grid." The additional ethernet port allows IT departments to save a port when connecting an extra door at the server. Installers can eliminate a long cable run when connecting an additional IP device.

Every IPPro® controller comes with secure, built-in web server to manage up to 32 doors from any standard web browser to allow for real-time monitoring, user management and audit trail up to 5,000 events. Or, download our FREE PLUS PC-Client software to control up to 100 doors from a single PC. IPPro® PLUS is a role-based access control software suite with different interface modules.

- Controls one door directly, with unlimited expansion capabilities
- TCP/IP communications (100/10Mbps)
- DHCP or Static IP addresses
- Password protected built-in web server or FREE downloadable 'Grid' software
- Two ethernet ports
- Live transaction monitoring
- Entry/exit wiegand reader capability
- Reader short circuit protection
- Compliant with PoE+ standard
- 60,000 users
- Multiple credential modes & batch card enrollment
